Caution: Make sure firearm is not loaded. Remove magazine and examine chamber. Use safe handling procedures at all times.

1. Separate the pre-assembled mount and arrange all parts on flat surface.

2. Turn the Bottom Cover upside down, and open the Bottom Cover wide and slide it through the barrel and the front sight.

3. Rotate the Bottom Cover around the barrel for 180 degrees and push it towards the gas block until it stops. Make sure that the rib at the bottom gas block is sandwiched between the two horizontal tabs inside the Bottom Cover.

4. Take care not to interfere with the use of sling swivel at the bottom gas block by having the sling swivel situated at the oval open cut area of the Bottom Cover.

5. Open the Bottom Cover wide from the two sides again and insert the 2 Barrel Spacers into the Bottom Cover for a secure fit.

6. Place the Top Cover onto the Bottom Cover and properly align them by the connecting screw holes on the sides.

7. Tighten four of the provided shorter screws from the two sides with the included Allen Wrench to lock the Bottom Cover and Top Cover firmly.

8. Push the mount towards the gas block again until it stops to make sure the mount is in full contact with gas block. Tighten the three larger locking screws from the right side at the front to lock the mount solidly with the barrel.

9. Install accessories such as Open Red-dot Sight, Flash Light, Laser Sight, Bi-pod, Foregrip on the mount for most practical and versatile accessory applications.
